

# **Traci Bolton**

## **VP General Music Meeting Report**

**23 April 2022**

### **Music Technology**

I have started conversations with several music educators around the state that include music technology as part of their music curriculum. It is a fast growing subject and I feel our membership would benefit greatly from support.

### **Practical Theory**

Practical application of theory is a hard subject to address. We tend to think of it only in the context of AP Music Theory. It is applicable to both general music and traditional ensembles. I have begun to find ways in which we can provide support for those who might want direction/inspiration incorporating theory (not AP) into classes.

### **Popular Music Collective**

Collaborative work has been done with Jocelyn Prendergast for a presentation on creating an opportunity for students across the state to come together and create original music for performance at MMEA clinic.

### **Other details:**

I have been contacted by one person looking to submit a clinic proposal for the 2023 clinic. We are waiting for the link to go live on the website.
